

HALO 75WDG SELECT

Selective post-emergent herbicide

ACTIVE INGREDIENT

Halosulfuron-methyl – *Group 2*

% ACTIVE INGREDIENT Halosulfuron-methyl . .75%

FORMULATION

Water dispersible granule

CHEMICAL FAMILY
Sulfonylurea

BRAND ALTERNATIVE

Sedgehammer®

MODE OF ACTION
ALS Inhibitor

RESTRICTED USE

SIGNAL WORD

Caution

PACKAGING 10 x 1.33 oz

LABELED USES

Residential and commercial turfgrass

Established woody ornamentals in landscape areas

Golf course turf

Sports turf

Public recreation areas

School grounds

Roadsides

Sod farms and non-crop industrial sites

Halo 75WDG Select™ is a selective, post-emergent herbicide formulated specifically to kill nutsedge and broadleaf weeds growing in and around turfgrasses, established ornamentals, shrubs, or trees. Can be used in both warm-season and cool-season turfgrasses, landscaped areas, and other listed non-crop sites.

Halo 75WDG Select™ should be applied post-emergence to turf and landscape ornamental areas where weeds are an issue and actively growing. This product is generally regarded as gentle to labeled turfgrasses, both cool and warm season types, and they should be well established before application occurs.

PRODUCT BENEFITS

- Post-emergent control of yellow and purple nutsedge
- · Suppresses annual and green kyllinga
- Suppresses tough broadleaf weeds such as horsetail and ragweed
- Low use rates .66 to 1.33 oz/A
- Can be tank mixed with non-ionic surfactants for improved penetration
- · Not for use on edible plants or gardens.

HALO 75WDG SELECT

Selective post-emergent herbicide

APPLICATION INFORMATION

When applied as directed under the conditions detailed in the label, the following established turfgrasses are tolerant to this product:

Warm season grasses

Bahiagrass St. Augustinegrass

Seashore paspalum Centipedegrass

Kikuyugrass Zoysiagrass

Bermudagrass

Cool season grasses

Bentgrass, creeping Bluegrass, Kentucky

Fescue, fine Fescue, tall

Ryegrass, perennial

Established woody ornamentals in landscaped areas

This product may be applied at specific rates as a post-directed spray around any established woody ornamental species in landscaped areas. For transplanted woody ornamentals, allow three months after transplanting before applying this product.

NOTE: Avoid contact of this product to leaves of desirable plants since foliar injury, discoloration or death may result

Fallow treatments

This product may be used on fallow areas prior to the establishment of turfgrass or woody ornamental plants. Allow 4 weeks between application and seeding or sodding of turfgrass, or transplanting woody ornamentals.

Use precautions

For optimum results, do not mow turf for 2 days before or 2 days after application. This product is effective if no rainfall occurs within 3 hours, but best results are obtained with no rainfall or irrigation for at least 4 hours. This product may be used on seeded, sodded, or sprigged turfgrass that is well established. Allow the turf to develop a good root system and uniform stand before application. Treated areas may be overseeded with annual or perennial ryegrass or bermudagrass, 2 weeks after application.

Color plants or herbaceous ornamentals may be injured when transplanted into landscaped areas treated with **Halo 75WDG Select**[™]. Avoid application of **Halo 75WDG Select**[™] when turfgrass or nutsedge is under stress since turf injury and poor nutsedge control may result.

- DO NOT apply as an over-the-top spray to desirable flowers, ornamentals, vegetables, shrubs or trees
- DO NOT apply this product to golf course putting greens
- DO NOT apply this product through any type of irrigation system
- DO NOT apply this product by air

Post-emergent weeds controlled

Purple nutsedge Giant ragweed
Yellow nutsedge Horsetail

Pre-emergent weeds supressed

Cocklebur Kyllinga, spp.

Common sunflower Pigweed

Common ragweed Velvet leaf
