

MSO SELECT[™]

Enhance your herbicide application

PRINCIPAL FUNCTIONING AGENTS

Modified vegetable oil
Proprietary emulsifiers

% ACTIVE INGREDIENT

100%

FORMULATION

Concentrate

MODE OF ACTION

Modified vegetable oil

RESTRICTED USE

No

EPA REGISTRATION

N/A - All ingredients are
exempt from tolerance
under 40 CFR 180

SIGNAL WORD

Caution

PACKAGING

2 x 2.5 gal

LABELED USES

Tank mixtures

MSO Select[™] is a unique combination of highly refined methylated seed oil, selected emulsifiers and surfactants. **MSO Select[™]** is readily absorbed into the waxy cuticle of plants, allowing the active ingredient to reach its target more efficiently. When tank mixed, **MSO Select[™]** causes the solution to have an oily texture, allowing the product to remain in its liquid state longer after application.

PRODUCT BENEFITS

- Penetrates waxy cuticles
- Slows evaporation of actives
- Effective during hot, dry conditions
- Works on both grassy and broadleaf weeds

How it works

Moving the herbicide past the waxy cuticle on leaf surfaces and into the interior of the plant, is a significant barrier to achieving consistent post-emergent weed control. If the actives cannot penetrate the leaf, they will simply remain on the surface until they evaporate or are washed off. The addition of **MSO Select[™]** will improve the performance of spray applications by enhancing the penetration of active ingredients through the weather hardened cuticle of targeted plant to the mode of action site. **MSO Select[™]** also slows drying time which enables better uptake of the herbicide and more complete control.

Directions for use

Follow the directions on all pesticide labels. Use **MSO Select[™]** with any pesticide that requires or suggests the use of an MSO, ESO, MVO or other oil-based adjuvants. The first time the product is used, perform a compatibility (jar) and phytotoxicity test before application.

Use rates

Herbicides, defoliant, desiccants - 2 quarts to 1 gallon per 100 gallons of spray mix.

Insecticides, fungicides, miticides - 8 ounces to 5 quarts per 100 gallons of spray mix.
