

AZOXY D SELECT™

Brown patch control on creeping bentgrass putting green

Dr. Joe Roberts, Clemson University

Trial Objective

To determine the efficacy of fungicide and fungicide combinations on brown patch disease of creeping bentgrass maintained as a putting green.

Materials and Methods

- Trial was initiated on July 3, 2020 and concluded on August 25, 2020.
- Foliar diseases were controlled with broadcast applications of chlorothalonil prior to trial initiation. Testing plots were 3 ft by 10 ft.
- Treatments were arranged in a randomized complete block design with 4 replications.

- There was a non-treated control plot for fungicide comparisons.
- Fungicide treatments were applied at either 14 or 28 day intervals.
- % plot area infested for Brown Patch was recorded in each plot

Trial Results and Conclusions

- Azoxy D Select reduced brown patch disease similar to Briskway® fungicide.
