

Quintessential™

HERBICIDE

TAKING QUINCLORAC PERFORMANCE TO THE NEXT LEVEL

ACTIVE INGREDIENT

Quinclorac – Group 4

% ACTIVE INGREDIENT

18.92%

FORMULATION

Liquid concentrate (1.5L)

CHEMICAL FAMILY

Quinoline carboxylic acids

BRAND ALTERNATIVE

Proprietary

MODE OF ACTION

Auxin mimic

RESTRICTED USE

No

SIGNAL WORD

Caution

PACKAGING

4 x 0.5 gal

LABELED USES

Grounds or lawns
around residential and
commercial establishments
Golf courses
Multi-family dwellings
Military and
other institutions
Parks and athletic fields
Roadsides
Schools
Cemeteries
Sod farms

Quintessential™ with H-Value™ Technology alters the formulation of quinclorac in a way that improves absorption of the product into the plant. That means faster activity and higher rate load in the targeted weed, as well as improved performance in drought stress or rainfast situations. And unlike any other herbicide on the market, Quintessential demonstrates improved control of crabgrass at all growth stages, including the problematic 3-5 tiller stage. Quintessential will be the essential tool for combatting crabgrass and other troublesome turf weeds.

PRODUCT BENEFITS

- Unique, patent-pending formulation powered by H-Value Technology, a proprietary performance additive that increases efficacy
- Controls crabgrass including the mid-tiller stage of growth
- Enhanced drought stress and rainfast performance

Quintessential™

HERBICIDE

TAKING QUINCLORAC PERFORMANCE TO THE NEXT LEVEL

In a rainfast comparison with a competitive quinclorac product, the results indicate efficacy at 2 hours and beyond with Quintessential, while it takes 12 hours for a competitive product to achieve the same level of effectiveness.

"In any condition that's going to limit herbicide absorption into the plant, Quintessential is going to outperform other quinclorac-containing products."

Dr. Shawn Askew,
Virginia Tech

% Crabgrass Control 3-5 Tiller (2019 Tennessee)
